TEAM-FOCUSED PRINCIPAL DEVELOPER

Summary

I am looking for a Senior/Principal Web Developer, Development Team Leader, or Architect position in a technology-oriented, people-focused company. My interests lie in web application design, implementation, and optimization. My strengths lie in designing .NET and web standard solutions that solve real users' problems, with a collaborative communication style with end users and/or product owners. I also enjoy finding ways to make development teams more productive and OOP- and TDD-focused. I strongly prefer remote work but also value in-person working sessions when it justifies the commute time.

Top-rated developer on the team most years • Promoted multiple times from within • Mentor to Junior developers • Tenacious problem-solver • Love learning to achieve mastery and then incorporating into team best practices

EXPERIENCE AND SUCCESSES

Russell Investments, Seattle, WA Financial Services

February 2007 to Present

Principal Architect, Web Development — October 2021

Primary developer on RussellInvestments.com • Program business logic and automated processes in C# • Create multi-lingual ASP.NET MVC Razor views and React components with WebAPI data sources, using TDD • Upgraded Sitecore 9.0 to 10.2 • Rebuilt Octopus process steps to achieve layered, clean deployments of a large, monolithic solution • Currently architecting migration to modern composable headless Web CMS using Next.js and .NET Core WebAPI

Associate Director, Application Development — March 2019

Led team (6 direct reports, 3 indirect reports, 2 contractors) through multiple, multi-year projects • Personally wrote a daily task to build a manifest of data needs from unpredictable content and then extract comprehensive fund data from a custom internal WebAPI, still used today • Personally wrote logic using a T4 text template to generate C# classes from dynamic database objects, so developers can write strongly-typed code

Manager, Application Development — May 2017

Replaced 5 extranet sites with authenticated features on main website • Administered Sitecore: content editor authorization, scheduled tasks, and publishing service • Trained and mentored 5 developers in Sitecore • Resolved site integration issues with internal systems

Lead Web Developer — March 2015

Introduced to Sitecore and was able to deliver advanced configuration and development within 6 months • Replaced 2 legacy websites with one global Sitecore site • Developed 10+ multi-language components using controller-based WebAPI in C# • Developed custom Sitecore pipelines using config transforms and C#

Senior Web Developer — April 2011

Optimized in-house C#, SQL, and XSLT code for global use • Basic support and maintenance of iOS application, Russell Investments Insights (no longer available)

Web Developer — February 2007

Built the Economic Recovery Dashboard, replicated in 3 regions and viewed millions of times since • Built common web standards Javascript and CSS framework

University of Maryland Medical System, Baltimore, MD Healthcare
December 2005 to January 2007

Programmer

Full lifecycle development on five internal ASP.NET 2.0 web applications • Converted six legacy web applications to ASP.NET

Educate, Inc., Baltimore, MD Education Tutoring
May 2005 to December 2005

Application Developer II

Full-stack ASP.NET web development

Milner-Fenwick, Inc., Timonium, MD Medical Video Education
February 2002 to May 2005

Webmaster & Graphic Artist

Sole ASP.NET developer for health video streaming website

CERTIFICATIONS

Sitecore Certified Developer, August 2015

EDUCATION

The Art Institute of Seattle, Seattle, Washington — AAA, Multimedia & Web Design, September 2001

University of Virginia, Charlottesville, Virginia — BA, Biology, May 1996

CORE TECHNOLOGIES

C# • .NET Core WebAPI • Sitecore 8.1-10.2 development, configuration, and administration • Javascript • Next.js • React • ASP.NET Core MVC • T-SQL and database design • Advanced Git, including main branch administration • Octopus deployment process design • Preference for TDD
